

# Online Bakery Application

## Business Analysis Case Study

Designed by: Jennifer Francis-Nkporwi — Role: Business Analyst

# Business Problem

## Manual order channels

Phone, walk-ins, messaging apps → errors & miscommunication

## Poor inventory control

No structured tracking → frequent stock-outs

## No real-time sales

Delayed reporting → slow decisions

❏ Result: Reduced efficiency and a weaker customer experience

# Project Objectives

## Reduce errors

Target: at least  
70% fewer order  
mistakes

## Enable online ordering

Customers place  
& pay for orders  
online

## Improve inventory

Accurate  
counts, fewer  
stock-outs

## Real-time sales

Live dashboards for quick decisions

## Current State (As-Is)

- Orders handled manually
- No structured inventory system
- Sales tracked on paper
- High dependency on staff accuracy

📌 Challenges: delays • errors • inefficiency

# Proposed Solution (To-Be)

## Online ordering & payments

Secure checkout, order tracking, scheduling

## Automated inventory

Real-time counts, low-stock alerts

## Real-time sales insights

Dashboards for daily decisions

## Streamlined order processing

Faster fulfillment, fewer errors

Goal: Improve efficiency and customer satisfaction

## Key Features

- Online order placement & tracking
- Automated inventory updates
- Low-stock alerts & reorder suggestions
- Sales & daily performance dashboard

# Process Improvement

## Before

Manual workflow,  
high error rate, no  
visibility

## After

Automated  
workflow, real-time  
updates, improved  
accuracy

Outcome: Faster, more reliable operations and fewer mistakes

# Stakeholders

## **Bakery Owner (Admin)**

Inventory, pricing,  
reports, user roles

## **Customers**

Order online, pay,  
schedule  
pickup/delivery

## **Bakery Staff**

Order fulfillment,  
stock updates,  
notifications

## **Payment Provider**

Secure payments,  
refunds,  
transaction  
reports

# Conclusion & Recommendation

## Implement the online bakery system

Phased rollout: ordering → inventory → analytics

## Expected benefits

Higher efficiency • fewer errors • scalable growth

## Next steps

Pilot launch, staff training, monitor KPIs

📌 Recommendation: Proceed with implementation to support business growth
